

JS Task 3 : OCT 2021

Step 1: Have a good look at the following image. It shows some products on the left block with an Image and price(not shown in the product card) and product name. Create an HTML file for creating the following image. Also, Create a JavaScript Array containing some products, their image [url](#), and product name.

Step 2: Clicking on the product card will add the item on the right side with the price.

Step 3: There is a delete button with each product. Clicking on that button will remove the item from the right hand side card/list.

Step 4: Use necessary HTML+CSS to achieve a design like the above image.

Step 5: Use necessary JavaScript/jQuery functions for adding the product to the right side list and removing it.

Step 6: Upload your code to a public github repo. Send us the link.

Deadline: ASAP
